

On the Subject of Placeholder Talk

What's a backslash again?

The module has a display containing a message alongside 4 buttons below it. The message on-screen consists of 2 phrases seperated by a line break. The first phrase can be solved within this first page and the second phrase in pages 2-5.

Both phrases have their own numbers. Figure out both values and add them together. If outside values 1-4, subtract/add 4 until you are. This new number is the button label that needs to be pushed. If an incorrect button is pushed, the module will strike and a new phrase will generate. If the correct button is pushed, the module display will turn blank and the module will be solved.

Extracting the value from the module's first phrase

Start with N = 1. Add 1 to N for every current strike then proceed to use the tables in the following ways:

- Subtract N from one of the rows in the left/middle table.
- Add N from one of the rows in the right table.

Words after THE ANSWER	Subtract N with	Words after THE ANSWER	Subtract N with	Words after the 2 left tables	Add N with
AT	-2	IS THE IN	2	FIRST POS.	1
	-1	IN IS		SECOND POS.	2
IS IN THE	0	IS IN.		THIRD POS.	3
IS THE		LIES		FOURTH POS.	4
LAST-		A	3	FIFTH POS.	5
IS IN UH		THE		MILLIONTH POS.	10
IS	1	FIRST-		BILLIONTH POS.	
IS AT		IS IN		LAST POS.	-4
IS INN		IN	27		-1
UH		UH IS IN	30	AN ANSWER.	-7

\*If none of the phrases fit in either table, refer to the row containing nothing.

**Extracting the value from the module's second phrase**

The following contains every message from the module. Find the exact message below and the number given is the second phrase's value. There are two exceptions to this that must be followed as well:

- If the phrase contains an odd number of /, add 1 to the second phrase's value for every \ present on the module's display.
- If the phrase asks you to add/subtract N, apply it to the second phrase's value.

Value: 1	Value: 2
WAIT, IS THIS A BACKSLASH?	IT'S EMPTY
THEIR ARE TWO BACKSLASHES	ZERO
ALFA BRAVO CHARLIE DELTA ECHO FOXTROT	ALL OF THESE ARE SYMBOLS: SLASH SLASH BACKSLASH
